

How to Join Realm Connect

Instructions for Android Devices

Ready to log in to Realm Connect and discover new ways to connect with Highland?
Follow the steps below to create an account and become acquainted with the platform!

To access Realm Connect on your computer, please see the [Windows](#) instruction sheet.

Step-by-Step Instructions

Haven't created an account yet? Start here!

1. Find your invitation email.

You should have received an email invitation from **Highland Presbyterian Church** asking you to join **Realm Connect**. If you do not see it, check your Spam or Junk folder. The invitation must be opened within 90 days – if you need another invitation, please contact the church office.

2. Open the invitation link.

Click the link in the email to accept Highland's invitation.

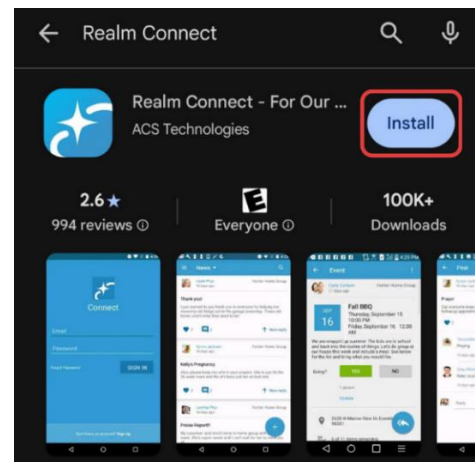

3. Create your Realm account.

Follow the prompts to confirm your information and create your Realm account. Your username is typically the email address where you received your invitation. Your password **must be at least 8 characters long** and meet **3 of these 5 criteria**: uppercase letter, lowercase letter, number, special character, or 15+ characters. Avoid using 3 or more characters from your email/username, repeating characters (aaa), or sequences (123, abc).

After creating an account, familiarize yourself with the platform:

1. Open the Google Play Store on your device and find the Realm Connect app.

On your device, open **Google Play**.
Search for **Realm Connect** and find the app published by **ACS Technologies**.
Click **Install** to begin downloading the app.

2. Sign in to the application.

Once the app is downloaded, open it. Click **Sign In** and choose the option to **Sign in with Email / Password**. Enter the same email address and password you used when creating your Realm account, and click **Sign In**.

3. Allow notifications (if you'd like)!

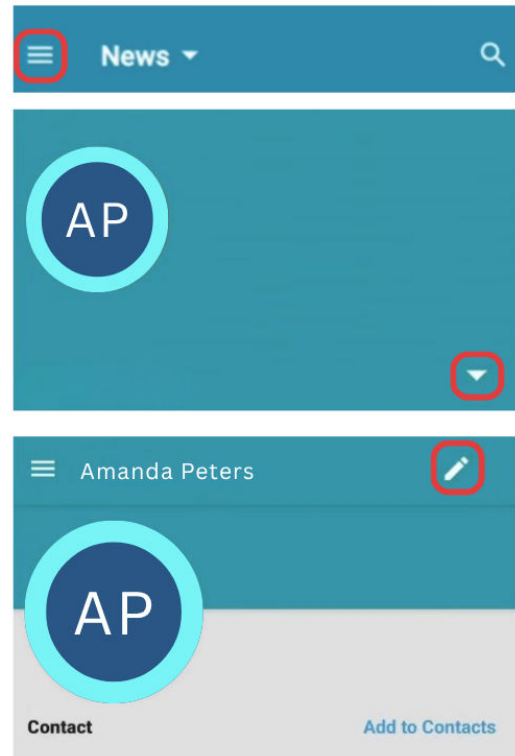

After signing in for the first time, you may be asked to turn on notifications. If you'd like to receive notifications, click **Allow** when the pop-up appears. If you do not want to allow notifications, click **Don't Allow**.

4. Review your profile and choose your privacy settings.

Select the **Menu Icon** in the upper left corner. On your profile page, click the small arrow to open the menu, and choose **Manage Account**.

Confirm that your email address, phone number, address, and photo are accurate. If your profile shows an older photo of you, please upload a new one!

If you need to make any changes, click the **Edit Icon** in the upper right corner, update your information, and click **Save**. You can adjust your privacy settings when editing each individual profile field.
